

WHO WE ARE

At Learn with IntraEdge, we redefine what a learning agency looks like. We design and develop next-level learning experiences while tackling the challenges that companies often face when it comes to training.

We engage learners by infusing every course we create with innovative, memorable and immersive content and modalities. Throughout the learning design process, we map learning objectives to the competencies that will improve learners' knowledge and performance.

With our diverse portfolio of projects, clients and expertise, we are ready to collaborate to create effective training on any subject.

DESCRIPTION OF TRAINING:

The Agile project management methodology has become extremely popular in recent years due to its simplicity and ease of application by **companies and development teams alike**. The decision for a company to move towards Agile is an important one, and requires an effective instruction strategy during implementation. For individuals and organizations interested in implementing the Agile approach, Learn with IntraEdge has developed a fully online, self paced course explaining Agile principles in an engaging and approachable way. In this course, learners are introduced to the Agile development process and best practices for working on development teams. We incorporated themes and storytelling features to truly bring Agile principles to life with the use of instructional elements including videos and interactive activities to increase learner interest and engagement.

Our team of experts deliver creative training programs that address key objectives in order to reach our client's goals. With each project, we aim to offer the best return on investment by increasing learner engagement through captivating content design, fun interactive experiences and unique brand essence.

OUTCOMES:

- Understand and apply the principles of the Agile development process.
- Learn how the Agile process can enable teams to provide better and faster product delivery and help them cope better with project changes.
- Align development with customer needs and company goals while staying in control of the project schedule, scope and budget.
- Promote a more realistic project management practice which embraces review and adaptation, a leadership philosophy that encourages teamwork, self-organization and accountability.

DELIVERABLES:

Online learning (eLearning) course with interactive exercises, knowledge checks, and exams
