

## WHO WE ARE

At Learn with IntraEdge, we redefine what a learning agency looks like. We design and develop next-level learning experiences while tackling the challenges that companies often face when it comes to training.

We engage learners by infusing every course we create with innovative, memorable and immersive content and modalities. Throughout the learning design process, we map learning objectives to the competencies that will improve learners' knowledge and performance.

With our diverse portfolio of projects, clients and expertise, we are ready to collaborate to create effective training on any subject.

## DESCRIPTION OF TRAINING:

In recent years, data privacy laws have been front and center all across the globe. For our client, a provider of automated data privacy management systems, we have created an online training program to maximize customer success in their implementation of data privacy practices. Our team partnered with data privacy experts and lawmakers to create a course that models how clients can use a data privacy portal to protect the data of their customers.

Our team of experts deliver creative training programs that address key objectives in order to reach our client's goals. With each project, we aim to offer the best return on investment by increasing learner engagement through captivating content design, fun interactive experiences and unique brand essence.

## OUTCOMES:

- We delivered an interactive, self paced, online learning program to guide the learner through using a new data privacy portal to achieve their organizational compliance goals.
- Our course has supported our clients not only in communicating the new content, but also in learning to apply the knowledge in different business scenarios.
- The addition of short instructional videos and sales guides has exponentially increased the adoption of the data privacy portal which in turn showed a direct correlation to ROI.

## DELIVERABLES:

Online learning (eLearn) course with interactive exercises, knowledge checks, and exams
