WHO
WE ARE

At Learn with IntraEdge, we redefine what a learning agency looks like. We design and develop next-level learning experiences while tackling the challenges that companies often face when it comes to training.

We engage learners by infusing every course we create with innovative, memorable and immersive content and modalities. Throughout the learning design process, we map learning objectives to the competencies that will improve learners' knowledge and performance.

With our diverse portfolio of projects, clients and expertise, we are ready to collaborate to create effective training on any subject.

DESCRIPTION OF TRAINING:

New tools and platforms are the cornerstone of technological advancement and their application has proven to be the key to operational success of modern companies. A well designed and executed training effort is crucial for any new platform or tools' adoption. We are able to support our clients in designing and delivering effective training programs.

We partnered with subject matter experts and product leaders to offer a comprehensive training for external partners and clients to introduce new platforms. We support our clients' launch efforts by providing an engaging training that teaches the learner the use and benefits of new enterprise platforms.

Health Management System
For a client who focuses on innovation, compliance, and security, we created a platform introduction of a health and safety system that supports scalable and effective contactless temperature measurement for affected and at risk populations.

Enterprise Collaboration Platform
For a global social media company, we developed a comprehensive training for external partners and clients to educate on the use of a new enterprise collaboration platform. Learners of this course explore the functionality of the new platform, learn all about its features and applications, as well as how to maximize the platform's benefits for different types of user scenarios.

Our team of experts deliver creative training programs that address key objectives in order to reach our client's goals. With each project, we aim to offer the best return on investment by increasing learner engagement through captivating content design, fun interactive experiences and unique brand essence.

OUTCOMES:
- Optimized user experience.
- Deepened knowledge about new features and benefits of the platform.
- Measurable results proving faster adoption of the product.

DELIVERABLES:
- Animated video
- Online learning (eLearn) courses with interactive exercises, knowledge checks, and exams
- Ongoing maintenance of material based on product releases
