

## WHO WE ARE

Learn with IntraEdge is a performance ROI-driven learning agency where we create, design and develop new ways of seeing and consuming content while addressing the challenges most companies experience when training employees, clients and vendors.

We use innovation and immersion as the foundation of our learning design process to deeply engage the learner. As we design our courses, we focus on mapping the learning objectives to competencies necessary to improve knowledge and work performance.

Through our diverse portfolio of projects, clients and experience, we are able to support you in creating effective training on a wide variety of topics.

## DESCRIPTION OF TRAINING:

Our team of experts deliver creative training programs that address key objectives in order to reach our client's goals. With each project, we aim to offer the best return on investment by increasing learner engagement through captivating content design, fun interactive experiences and unique brand essence.

Companies and educational institutions are moving to online learning as their modality of choice for education and professional development. An authentic learning experience is facilitated by proctoring services which enable knowledge to be acquired fairly and effectively. There is a need to maintain the integrity of their programs by applying an appropriate testing approach in this virtual setting.

Proctoring allows institutions to uphold that integrity by ensuring that exam takers verify their identity, remove all reference materials, and are not relying on any third party source that would give them an advantage over any other exam participant.

Tracking these steps allows the proctor to address any suspicious behavior and respond to technical questions if they arise during the exam. With our experienced team of proctors, we are committed to ensuring fair treatment and a safe environment which increases the quality of the learning experience.
